HackWimbledon

Welcome!

- Wifi (different this week)
- Toilets, Kitchen, Exits etc
- Future plans...

HackWimbledon

Upcoming meetups

- April 12, 19
- May 3, 17, 31

Upcoming events

- Hacky Racers, OggCamp, Maker Central, Retro Fest, EMFCamp...

21 years of
Arduino!

History

- Born in Italy
- Early boards – 8-bit Atmel, no wifi, shields
- 2010 UNO series
- (Brand dispute → Genuino/Arduino)
- Various upgrades (Yun, Wifi, etc) → 32-bit
- Qualcomm acquisition → “Q” products

What's *your* experience?

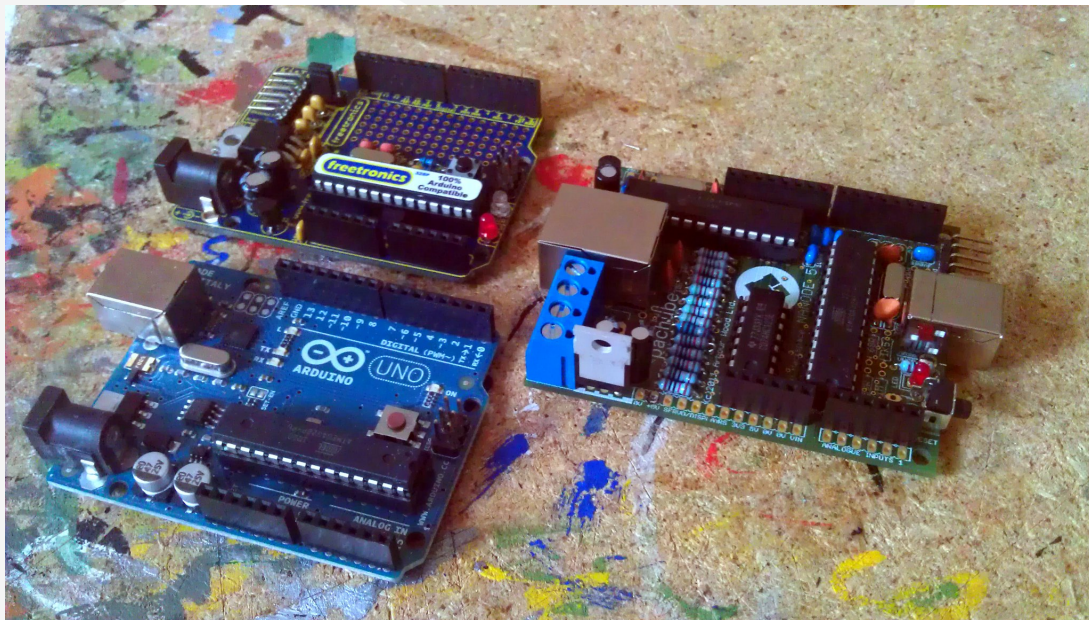

- None / I'm here to learn!
→ OK! what's your interest, can we help?

or ...

- First board?
- Favourite make of your own?
- Coolest thing you've seen?

Me + Arduino

- 2010–2013 “heyday” – my first UNO, hackathons, **Field Studies Council Hackday** “**Floggr**”, MQTT for Arduino
- Also e.g. OggCamp, Mini Maker Faire
- Nanode
- [insert gap here]
- ... Makeroni/HackWimbledon → Alvik, UNO Q

Prototyping – Arduino and Ubuntu

Posted on December 21, 2010

Tags: [Arduino](#), [electronics](#), [hacking](#), [homecamp](#), [Linux](#), [mbed](#), [MQTT](#), [Ubuntu](#), [udev](#)

One of those things I've been meaning to getting around to doing for ages is to explore this exciting new world of prototyping and hacking my own hardware devices together. A lot of [my fellow eightbars](#) and of course many of the [HomeCamp](#) community are big fans of the [Arduino](#) platform. I've also been dying to have a go with the [MQTT](#) client for [Arduino](#) that [Nick](#) has created (although I've recently also come across another platform called [mbed](#), and [MQTT](#) has been [ported to it](#), of which more to come soon). In fact, I've had one of the lovely Arduino starter kits from [::oomlout::](#) sitting on my desk for a while now, tempting me with its gadgetry and neatly-arranged components in a funky partitioned box... but life has been so hectic that it has taken me until today to finally crack it open! I'm not going to spend long talking about the Arduino today, except to mention that it was unexpectedly tricky to get working under my OS of choice, Ubuntu 10.10. I'd [read on Anton's blog recently that the new UNO board \(which I have\) needed a firmware update](#) in order to avoid some

My Arduino Uno board, via
[instagr.am](#) and iPhone, on Flickr

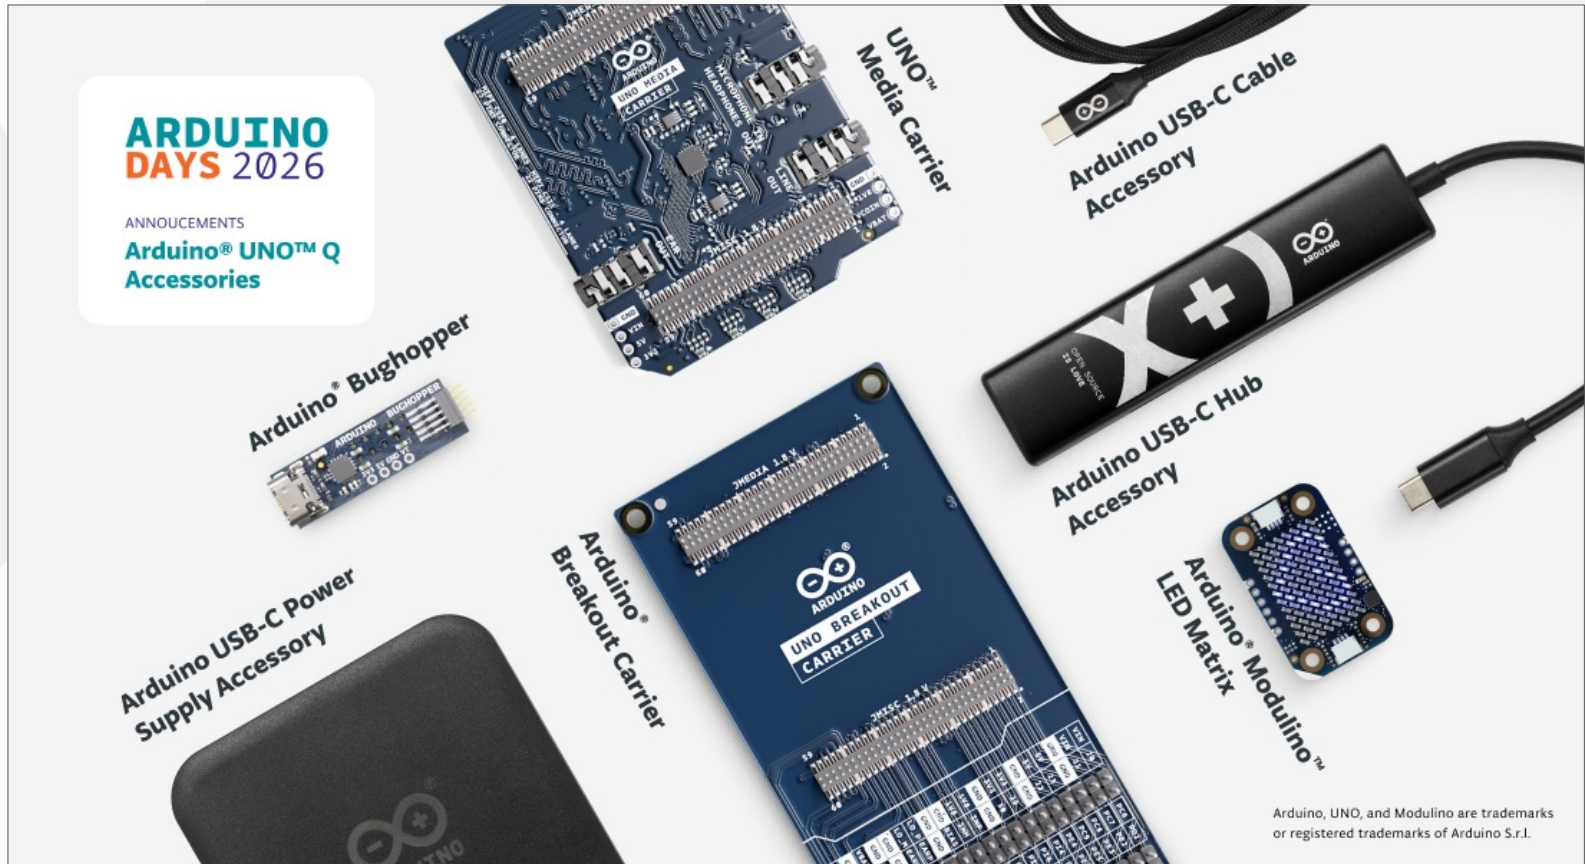

Why Arduino...

- Openness
- Hardware quality
- Ecosystem – hardware and software
- Ease-of-use

The Qualcomm Era

- Matter focus
- Modulino
- Dragonwing powered, AI
 - UNO Q
 - VENTUNO Q

Seven new (UNO Q) products

es/arduino-days-promo

Discover exclusive discounts

ARDUINO
DAYS 2026

New Alvik
for UNO Q?

Products of interest (to me)

- Alvik
- Nesso N1 → Meshtastic
- Nano Matter
- (also, pen plotter stuff)

March 27th - 28th
